Badico Trading GmbH

Preserving resources, creating value, shaping the future

We are an innovative and internationally active trading company for plastics, ADDINOL brand lubricants and industrial spare parts. Since 2012, customers all over the world have appreciated the high quality standard of our products, the extensive know-how, the exceptional services and, last but not least, the absolute reliability of BADICO Trading GmbH.

An overview of our core services

> Plastics trade & recycling

In times of rising raw material prices and increased environmental pollution, plastic production residues from sprues, missing parts and other rejects/residual quantities are becoming increasingly sought-after resources. We can help here too!

> Plastic compounds

We develop the right composition of the appropriate plastic based on your specifications. In addition to 1A virgin materials, we also supply high-quality industrial grades for a wide range of applications.

> ADDINOL Lubricants

We are an international sales partner of ADDINOL Lube Oil GmbH. ADDINOL develops and produces the latest generation of high-performance lubricants. These include automotive lubricants for the highest requirements and pioneering developments for industrial applications.

> Industrial spare parts

We also specialize in trading new industrial parts and buying back industrial goods from reserve and surplus stocks, remaining stock, overproduction and stock clearance.

High flexibility

We supply small quantities for test productions as well as large orders for industrial applications.

Ecological responsibility

Our recycling solutions conserve resources, reduce your waste and are also sustainable.

Certified quality

Certified to ISO DIN 9001 - quality and ISO DIN 14001 environmental management that you can rely on.

Fast availability

Thanks to our reliable logistics partners, we offer short delivery times and fast processing. Around the clock and worldwide.

Sustainable & powerful

Tailor-Made Compounds & Recompounds

Our portfolio includes all compounds of PC, PC/ABS, ABS, PA 6 and PA 6.6, as well as some selected compounds of SAN, ASA, PC/ASA, PC/PBT, PA/ABS and PA 12 for injection molding and extrusion applications.

Our high-quality **1A virgin compounds** and **industrial quality grades** used in the following industries:

Automotive industry

- > Interior elements and decorative strips
- > Ventilation systems
- > Door and pillar trim and handles
- > Center and roof consoles
- > Instrument panels

Electrical industry

- > Electric meter and electrical enclosure
- > Plug and switch components
- > Outlets

Household and industrial equipment

- > Washing and coffee machines
- > Dust cleaners, blenders, irons and air conditioners
- > Lighting systems for industrial and residential applications
- > Office chairs

Based on your requirements the ideal composition of the plastic granule will be developed by our technical department.

Customized coloring, improved electrical conductivity, glass fiber reinforcement, and improved flame retardancy with UL listed products are just a small overview of our capabilities.

Our know-how makes you successful.

Successful Together

Marketplace for technical plastic resins, surplus quantities and regrind

We have focused on the trading of plastic granulates, new goods, surplus quantities and regrind.

Our focus is on technical, high-tech and TPE / TPU plastics, which we offer as 1A virgin resin, tested regranulates and clean post production regrinds.

We follow this principles:

- > Full commitment to customers and suppliers
- > Consulting on the right selection and procurement of high-quality and economical pricing plastic raw materials
- > Reliable, friendly and fair

Our network makes you successful.

Verantwortung für morgen

Professional consulting and sustainable recycling concepts for production scraps

BADICO Trading GmbH creates sustainable disposal concepts with the aim of separation and recycling as many types of plastic as possible.

Customer-specific subcontracts for grinding and / or granulation are also part of our services, as is the takeover of plastic waste.

In addition, we have international business relationships, selected logistics partners and the possibility of sorting and separating hybrid components (plastic-metal) and mixed plastics.

Well-known plastics manufacturers and processors as well as trading houses trust on our the know-how and our experience!

Our team will be happy to help you quickly and competently.

BADICO®

Your Partner for Plastic Compounds, Lubricants & Industrial Spare Parts

Your premier trading partner and service provider for plastic trading and recycling, technical plastic compounds, high-performance lubricants from the ADDINOL brand, and industrial spare parts. With us, you benefit from tailored products, efficient processes, and sustainable partnerships designed to meet your unique requirements.
